

# How to disable the pop up blocker and delete cookies with: Google Chrome

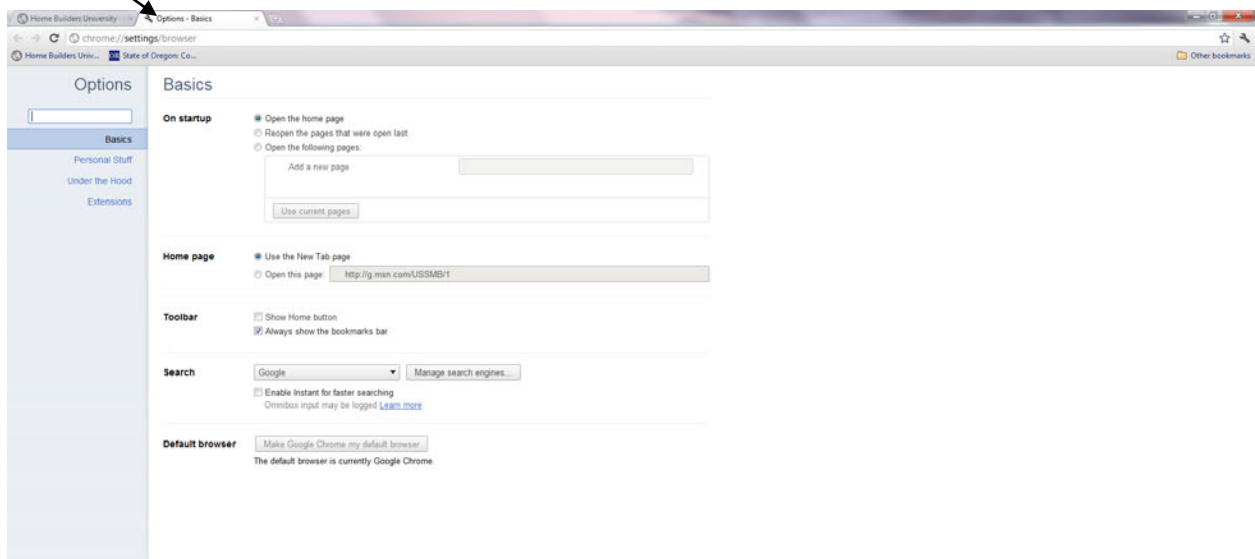

This is what the top of the browser looks like in Google Chrome.

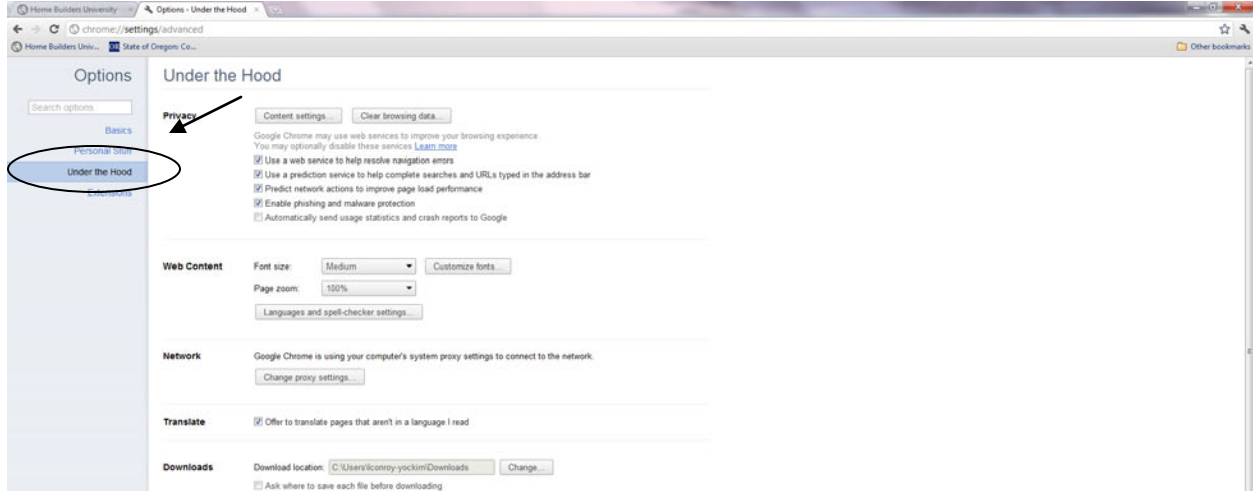

In the upper right hand corner, click on the wrench. Then click on options.

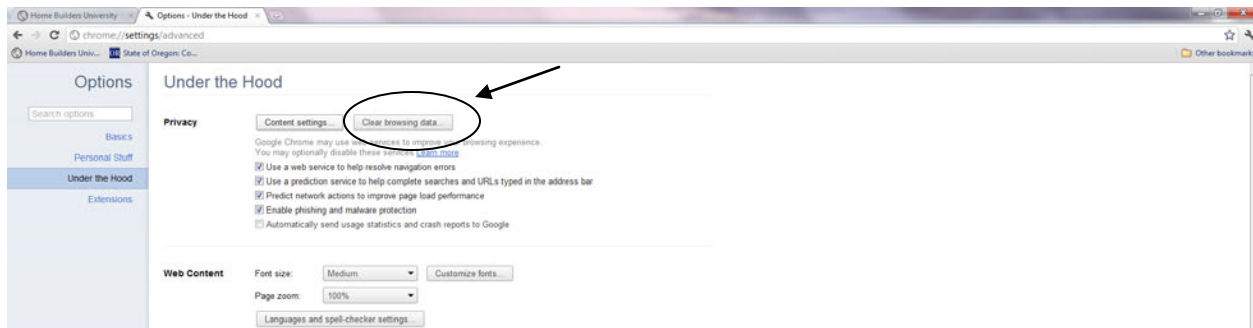

A new tab will open up with your "Options"

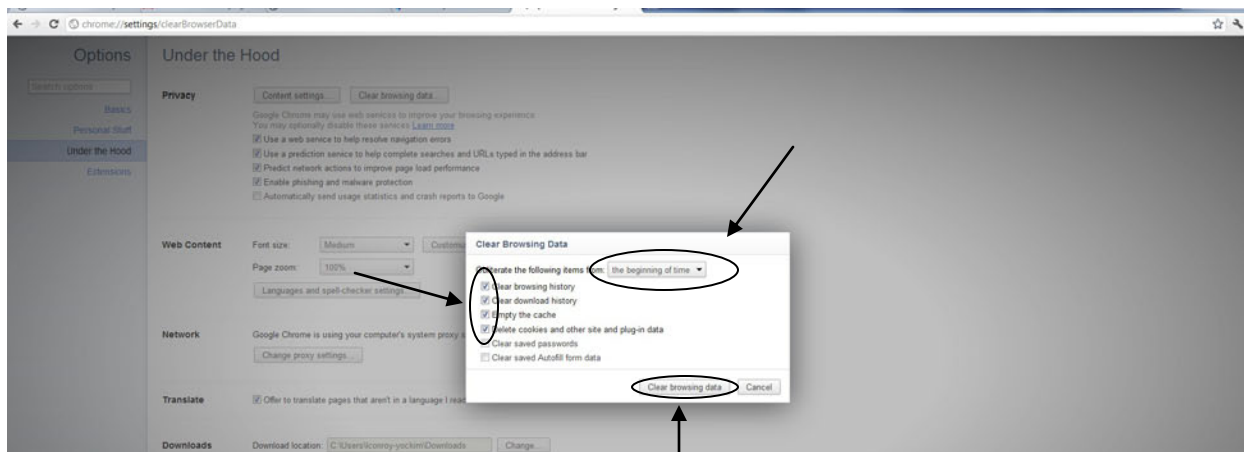

On the left hand side of the page, click on “under the hood.”

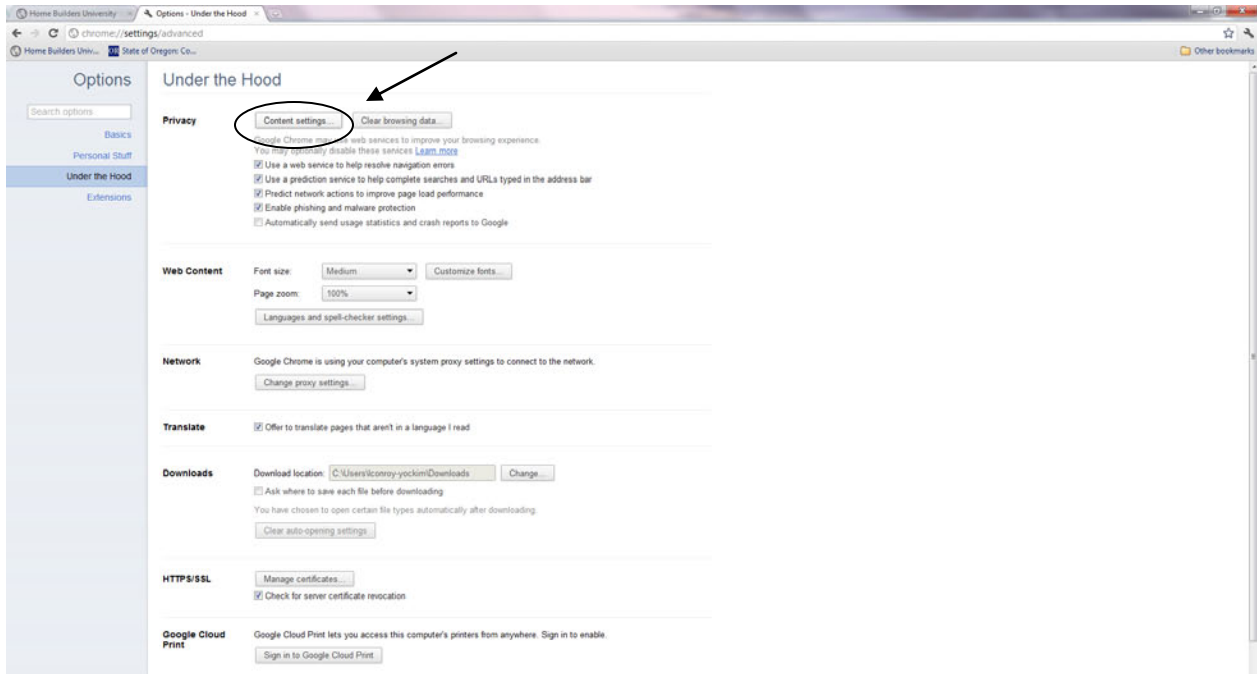

Click on clear browsing data.

A new box will appear. The first sentence asks for how far back you would like to delete the data. Use the drop down box to select “the beginning of time”. Then put check marks in the top four boxes. Then select “clear browsing data” at the bottom of the box.

It will take you back to the Under the Hood menu. Click on Content Settings at the top.

A new layer will appear labeled “content settings”. Towards the bottom of the list, you will see Pop-Ups. Make sure the “allow all sites to show pop-ups” button is selected. Then go up to the tabs at the top of the page. Click on the gray “x” next to options—content settings to get back to the HBU site.
